

GRIMAUD BOUVERET

DATA PRODUCT MANAGER / PRODUCT OWNER · DATA & BI, POWER BI, API

contact@grimaudbouveret.com · linkedin.com/in/grimaudbouveret · Fontainebleau / Paris · Freelance (SASU)
French native · English C2 · PSPO I · Data Product Manager RNCP 36129

Data Product Manager / Product Owner in a large international industrial group (Safran Aircraft Engines). I bridge business and IT: organising studies, running workshops with business teams, gathering and framing requirements, then driving the build of data and BI products end to end, from source to visualization. Strong Power BI and data-integration experience (API, automation), with a real culture of the data lifecycle and business adoption. AI-native: I design and put AI-tooled solutions into production (including use cases such as chatbots / assistants), and I teach AI and data at business schools. Domains covered: maintenance and commercial.

EXPERIENCE

Data Product Manager / Product Owner - Safran Aircraft Engines

2021 - 2026 · large international industrial group · maintenance & commercial domains

- **Project SPECTRE 4.0 (2024-2026)** - Product Owner of an application tracking the progress milestones of documentary evolutions of engine maintenance manuals. Requirements gathering, workshop facilitation, functional scoping, User Story writing, backlog prioritisation and Agile (Scrum) delivery.
- Migrated the process from Excel to an application (OutSystems); built the transformation pipelines (Python, Power Query); designed API integrations and automation flows between internal applications; delivered Power BI dashboards. Deep source-data remediation to build trust.
- **Project SCORE (2021-2024)** - Product Owner for the digitalisation of maintenance contracts: from scattered PDF documents to an application to consult, analyse the data and support decision-making.
- Owned the roadmap and backlog; structured the contractual data; designed API interconnections between internal applications; delivered Power BI reporting and functional documentation; coordinated business and IT.
- Across both projects: interface between business and technical teams, functional testing and validation (UAT), change management, user training and adoption tracking. Reporting adopted as the source of truth in steering committees.

Instructor - AI, Data & Prompt Engineering - Omnes Education (ESSEC, INSEEC, Sup de Pub)

2025 - present

- Design and deliver applied AI & data modules (generative AI, prompt engineering, data usage); I turn concrete AI use cases into teaching, which keeps my hands-on mastery sharp and my ability to explain them to business audiences.

Founder - Modulaire Studio (SASU)

2019 - present

- Designed and built full-stack web platforms (API integrations, automation); e-commerce and product data end to end.

Export & Project Manager - Festo

2015 - 2019

- Led international programmes worth €3M; multi-stakeholder coordination in an international industrial context.

SKILLS

- **Product & scoping** - product management · study organisation & workshop facilitation · requirements gathering & scoping · roadmap & backlog · Agile / Scrum (PSPO I)
- **Data & BI** - Power BI (dashboards, reporting) · SQL · Power Query · source-to-visualization integration · data lifecycle · data governance & trust
- **Tech & AI** - API integrations · automation (Power Automate) · Python · OutSystems · AI solutions in production (LLM / agentic) · technical dialogue with architects & data teams
- **Ramping up** - Data Platform / Data Warehouse environments (Snowflake): fast ramp-up, data & BI foundation already mastered

EDUCATION & CERTIFICATIONS

PSPO I (Scrum Product Owner) · Data Product Manager, RNCP 36129 · BSc International Commerce - UPEC
Languages: French (native) · English (C2, fluent)
